## **DETAILED ACTION**

### ***Response to Remarks***

1. The Office Action has been issued in response to amendment filed May 15, 2007. Claims 1-20 are pending. Claims 7 and 13 have been cancelled and claims 9-11 have been withdrawn from consideration. Applicant's arguments have been carefully and respectfully considered in light of the instant amendment, and are persuasive. Accordingly, claims 1-6, 8, 12 and 14-20 are allowed.

### ***Allowable Subject Matter***

2. The following is an examiner's statement of reasons for allowance: After reviewing the remarks made by Applicant in response to the non-final action the Examiner finds the remarks to be persuasive. The most pertinent prior art is Jones et al (Pub No.: 2003/0059098) and Neri et al (Pub No.: 2003/0021459). Jones discloses a document processing system comprising an automatic teller machine (ATM) electronically connected to one or more devices, the one or more devices. Jones's system also has a deposit device configured to receive an initial bank note, an image extraction device configured to extract one or more initial images from the initial bank note and from the counterfeit note, a transaction log device configured to attach a transaction log to the one or more initial images and a comparison device configured to compare the one or initial images to the one or more subsequent images in order to obtain a comparison result. However, Jones does not teach a retrieval device for tracing

Art Unit: 2624

the counterfeit bank note, which is configured to retrieve the transaction log attached to the initial bank note, if the comparison device determines that the one or more initial images of the initial bank note and the one or more images of the counterfeit bank note are within the range of similarity. Neri discloses a system for controlling banknotes which is configured to retrieve the transaction log attached to the initial bank note, if the comparison device determines that the one or more initial images of the initial bank note and the one or more images of the counterfeit bank note are within the range of similarity. However, neither Jones or Neri teach where an initial bank substantially the same as the initial bank note that has been identified as a counterfeit bank note at an external station. The examiner finds no reason or motivation to combine the above references in an obvious rejection thus placing the application in condition for allowance.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statements of Reasons for Allowance."

### ***Conclusion***

The prior art made part of the record and not relied upon is considered pertinent to applicant's disclosure.

Rodite (US Patent No.: 6,181,812) is cited to teach a two-pass document image processing method and system.

Nagayoshi et al (US Patent No.: 6,981,637) is cited to teach an automatic teller machine.

Graves et al (US Patent No.: 5,870,487) is cited to teach a method and apparatus for discriminating and counting documents.

Herley et al (Pub No.: 2001/0040993) is cited to teach a method for detection and difference of counterfeiting of documents have a characteristic color.
